

GdPicture is a worldwide leader in imaging technologies.

The brand created by the French company ORPALIS provides an SDK that covers all domains of document imaging, image processing and document management. In April 2013 ORPALIS is officially recognized as Young Innovative Company by the French Ministry of Research. Thanks to its innovative technologies and its customized technical support, ORPALIS offer solutions adapted to every need and budget. Please let us know how we can help!

Based on the GdPicture technologies ORPALIS developed several applications for end-users, individuals and professionals, general public and developers: PaperScan, ORPALIS PDF Reducer and ORPALIS DICOM Viewer. They're all available on the ORPALIS website, please come visit us here too!
